Angular.js forms Get, post, put, and delete

Get Request

HTML code:

```
<form ng-submit = "getFormData()">
```

```
<label>ID:</label>
```

```
<input type = "text"
```

```
ng-model = "formData.id">
```

```
<button type = "submit">Get</button>
```

```
</form>
```

```
<div ng-if = "data">
```

```
<p>Name: {{ data.name }}</p>
```

```
<p>Email: {{ data.email }}</p>
```

```
</div>
```

Angular JS

```
angular.module('myApp', [])
```

```
.controller('myController',
```

```
['$scope', '$http',
```

```
function($scope, $http) {
```

```
$scope.formData = {}
```

```

$scope.data = null;
$scope.getFormData = function()
{
    $http.get('/api/data/' + $scope.
        formData.id)
        .then(function(response) {
            $scope.data = response.data;
        })
        .catch(function(error) {
            console.error(error);
        });
}
}
);

```

Syntax :-

```

$http.get(url, [config])
    .then(successCallback,
        errorCallback);

```
